ABOUT OUR SERVICES

Your Trusted Partner in Fixed Asset Management

We help organisations achieve accurate asset records, improve visibility and strengthen control through our end-to-end Fixed Asset Management services.

OUR CORE SERVICES

FAR REVIEW

Analyse and validate Fixed Asset Register (FAR), identify gaps and categorise assets for verification.

ASSET TAGGING

Apply non-destructive barcode / QR codes for unique identification and traceability.

VERIFICATION

Physically verify assets across locations using mobile-based tools for accurate data capture.

RECONCILIATION

Match verified data with FAR, identify exceptions and prepare detailed reports with actionable insights.

OUR CAPABILITIES

Mobile-based
verification

Barcode & QR
solutions

Tag & barcode
printing

Scanners
(HHT)

Backend
reconciliation

WE SERVE A DIVERSE RANGE OF INDUSTRIES

BFSI

NBFCs

Telecom

Retail

Manufacturing

Automotive

Healthcare

Education

Data Centres

& More

WHY CHOOSE US?

PAN-INDIA PRESENCE

120+ cities
(and growing)

EXPERIENCED TEAM

150+ consulting
professionals

PROVEN TRACK RECORD

Large-scale assignments
for banks, NBFCs and
multi-location organisations

TECH-ENABLED PROCESS

Faster, accurate
and scalable

FLEXIBLE ENGAGEMENT MODELS

Project-based or
independent verification

A Trusted Partner in Fixed Asset Management

New Haribhakti Business Services LLP (nhbs) is a business consultancy firm providing specialised consulting and execution support in Fixed Asset Management and other advisory services.

With a strong PAN-India presence and an experienced team, we help organisations maintain accurate, reliable and verifiable asset records through a structured and technology-enabled approach.

120+
Cities across India

150+
Consulting Professionals

Multi-Industry Experience
Across BFSI, Manufacturing, IT/ITES, Healthcare, Education and more

OUR STRENGTHS

Domain Expertise

Specialised knowledge in Fixed Asset Management across industries

Technology Enabled

Mobile-based verification, barcode and QR tagging, real-time data capture

Experienced Team

150+ consulting professionals with PAN-India execution capability

PAN-India Presence

Projects executed in 120+ cities across India

Proven Execution

Successful delivery of large-scale multi-location assignments

OUR VALUE PROPOSITION

Helping You Achieve Better Asset Visibility, Control and Compliance

Accurate Asset Records

Reliable and verifiable asset data

Improved Traceability

Unique barcode / QR tagging for each asset

Efficient Reconciliation

Physical verification aligned with FAR

Reduced Manual Effort

Mobile-based data capture and automated reporting

Audit Readiness

Complete documentation and sign-offs

Scalable Solutions

Proven methodology for multi-location organisations

“ From asset data to business confidence.”

A Structured Approach for Accurate and Reliable Asset Records

Our proven methodology ensures complete verification, barcode tagging and reconciliation with the Fixed Asset Register (FAR).

01

FAR REVIEW & PLANNING

- Review existing Fixed Asset Register (FAR)
- Classify assets into scope / out of scope
- Split consolidated line items and categorise
- Finalize tag structure and verification plan

02

BARCODE / QR TAG DESIGN & PRINTING

- Design unique barcode / QR tag structure
- Print durable, non-destructive tags
- Customise tags for different environments
- Ensure clear and standardised tagging

03

PHYSICAL VERIFICATION & TAGGING

- Verify already tagged assets and capture details
- Tag non-tagged assets during verification
- Capture asset details (location, make, model, serial number, condition, photos, etc.)
- Resolve discrepancies on site with branch / location team

04

DATA CONSOLIDATION & RECONCILIATION

- Reconcile verified data with FAR
- Identify matched, not-found and new assets
- Analyse variances and resolve with client
- Prepare branch / location wise reports

05

REPORTING & SIGN-OFF

- Provide consolidated reports with branch-wise summary
- Share exception and gap reports
- Obtain sign-off from branch / location representatives
- Support data upload into client systems (if required)

TECHNOLOGY ENABLED VERIFICATION

Mobile-Based Data Capture

Real-time verification and asset recording

Barcode / QR Tagging

Durable and non-destructive tags

Cloud / System Integration

Support for data upload into client systems

Real-time Reporting

Location-wise visibility and MIS reports

Data Accuracy

Reduced manual effort and errors

KEY ATTRIBUTES CAPTURED

Location & Sub Location

Asset Name

Make & Model

Serial Number

Asset Condition

Photographs

Remarks

OUR PROCESS FLOW

PLAN

Review FAR and finalise scope

TAG

Design and print barcode / QR tags

VERIFY

Physical verification and tagging

RECONCILE

Match with FAR and resolve discrepancies

REPORT

Final reports and sign-off

OUTCOME

- ✓ Verified and tagged assets
- ✓ Reconciled data with FAR
- ✓ Improved asset visibility and control
- ✓ Exception and gap reports
- ✓ Audit-ready documentation
- ✓ Final data in client-required format

FIXED ASSET LIFECYCLE

End-to-End Asset Management for Greater Control, Compliance and Value

We support organisations across the complete fixed asset lifecycle, from planning and acquisition to disposal, ensuring accurate records, better visibility and compliance at every stage.

KEY OUTCOMES

Accurate asset records

Better control and visibility

Improved utilisation and ROI

Regulatory compliance

Optimised replacement and disposal planning

SUPPORTED BY TECHNOLOGY

Barcode
Widely used for fixed assets

QR Code
Higher data storage with quick scanning

RFID (Passive)
For large and high-volume environments

Integration with ERP / Asset Systems
Seamless data flow and reporting

PASSIVE RFID SOLUTIONING

Efficient Asset Identification for High-Volume and Complex Environments

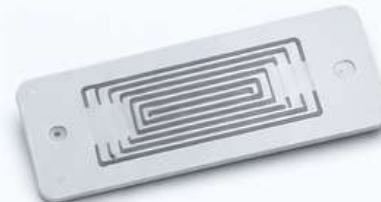

Passive RFID provides a cost-effective and reliable solution for identifying and tracking fixed assets, enabling faster verification and improved visibility, especially in large, multi-location and high-volume environments.

HOW PASSIVE RFID WORKS

PASSIVE RFID TAGS

- No battery required
- Cost-effective
- Suitable for most fixed assets
- Available in various form factors and materials
- Durable and reliable
- Ideal for high-volume and large-scale deployments

TAG OPTIONS (PASSIVE RFID)

Adhesive Tag

- Suitable for indoor use
- Ideal for office assets, IT equipment, furniture

On-Metal Tag

- Designed for metal surfaces
- Suitable for industrial assets and machinery

Rugged Tag

- For harsh environments
- Water, dust and heat resistant
- Suitable for outdoor and industrial use

Cable Tag

- Suitable for cables, pipes and small assets
- Easy to install and durable

SUITABLE APPLICATIONS

Office Assets
Desktops, Laptops, Furniture, IT Equipment

IT & Data Centre Assets
Servers, Network Equipment, Racks, UPS

Industrial Assets
Machinery, Tools, Plant & Equipment

Warehouse & Large Locations
High-volume assets with fast scanning

IMPLEMENTATION APPROACH

KEY BENEFITS

- | | | |
|---|----------------------------------|---|
|  | Faster verification | Reads multiple tags simultaneously |
|  | Higher accuracy | Reduces manual effort and errors |
|  | No line-of-sight required | Works even when tags are not visible |
|  | Better visibility | Real-time tracking across locations |
|  | Scalable solution | Suitable for large and complex environments |
| | Durable and reliable | Tags available for |

From Verification to Actionable Asset Insights

We provide comprehensive reports and data that enable better decision-making, improved asset control and compliance.

KEY DELIVERABLES

01 VERIFIED ASSET LIST

Asset ID	Asset Name	Make	Model	Serial Number	Location	Verified
FA-001256	Laptop	Dell	Latitude 7430	SCD324SRTY	Mumbai	Verified
FA-001257	Chair	Godrej	-	-	Mumbai	Verified
FA-001258	Printer	HP	LaserJet 400	CNB7K9L2	Mumbai	Verified
FA-001259	AC	Daikin	-	-	Mumbai	Verified
FA-001260	Desk	Godrej	-	-	Mumbai	Verified

- Complete list of verified assets with captured details
- Includes photographs and current asset status

03 BRANCH / LOCATION WISE REPORTS

Location	Total Assets	Verified	Not Found	New Assets (Not in FAR)	Variance %
Mumbai	420	405	10	5	2.4%
Pune	380	368	8	4	2.1%
Bengaluru	510	495	12	3	2.4%
Hyderabad	465	452	10	3	2.2%
Chennai	395	382	9	4	2.4%

- Detailed reports for each branch / location
- Helps in location-wise asset visibility and control

05 PHOTO GALLERY OF ASSETS

- Photographs of each verified asset
- Helps in audit, traceability and future verification

02 RECONCILIATION REPORT (WITH FAR)

Particulars	Count
Assets as per FAR	12,850
Assets Verified (Matched with FAR)	11,920
Assets Found but not in FAR	540
Assets Not Found	390

- Match / not-found / new assets with variance analysis
- Summary at branch / location and consolidated level

04 EXCEPTION AND GAP REPORTS

Type	Count	Remarks
Assets Not Found	390	Requires client review
Assets Found but not in FAR	540	To be capitalised / added
Duplicate Asset IDs	28	Needs rectification
Damaged / Illegible Tags	112	Retagging required
Inactive / Obsolete Assets	85	To be reviewed for write-off

- Exception reports for review and resolution
- Supports asset clean-up and FAR update

06 FINAL REPORT AND SIGN-OFF

- Consolidated report with management summary
- Branch / location sign-off from authorised representative

VALUE TO YOUR ORGANISATION

Secure and role-based access

Automated reports and dashboards

BENEFITS OF OUR TECHNOLOGY APPROACH

Higher accuracy

Faster execution

Complete asset traceability

Reduced manual effort

Improved reporting and visibility

SCALABLE FOR LARGE PROJECTS

Our technology and tools are scalable to handle multi-location and PAN India assignments with consistent data quality and standardised processes.

WHY CHOOSE nhbs

Your Trusted Partner for Asset Verification

Combining domain expertise, technology and execution capability to deliver accurate and actionable asset records.

nhbs
business next

DOMAIN EXPERTISE

Deep understanding of asset environments

Extensive experience in fixed asset verification across diverse industries and asset categories.

TECHNOLOGY ENABLED

Accurate and efficient execution

Use of barcode / QR code technology, mobile-based verification and real-time data capture.

PAN-INDIA EXECUTION

Multi-location project capability

Experienced teams deployed across 120+ cities to handle large and complex assignments.

STANDARDISED PROCESS

Consistent and high-quality delivery

Proven methodology, trained teams and standard operating procedures for uniform execution.

ACCURATE RECONCILIATION

Reliable and actionable reports

Reconciliation with Fixed Asset Register (FAR) with clear identification of exceptions and gaps.

TRUST & CONFIDENTIALITY

Secure and professional engagement

Adherence to data security, client confidentiality and professional standards.

OUR COMMITMENT

Accuracy

Reliable and verifiable results

Accountability

Clear roles, responsibilities and tracking

Partnership

Collaborative approach for long-term value

Continuous Improvement

Process innovation and adoption of best practices

Our focus is to deliver accurate, compliant and actionable asset records that add value to your business.

From Planning to Actionable Insights

A structured and proven approach to deliver accurate, reliable and actionable asset information.

01 KICK-OFF & PLANNING

Understand scope, locations and asset categories. Finalise plan, team deployment and communication with stakeholders.

02 REVIEW OF RECORDS (FAR)

Review and analyse the Fixed Asset Register (FAR), classify assets and prepare customised asset lists.

03 TAG DESIGN & PRINTING

Finalise tag/ barcode structure, print durable and non-destructive tags suitable for the client environment.

04 ONSITE VERIFICATION & TAGGING

Physical verification of assets, verify existing tags and tag untagged assets using barcode / QR codes.

05 DATA CAPTURE

Capture asset details including location, make, model, serial number, condition and photographs using mobile devices.

06 RECONCILIATION WITH FAR

Reconcile verified data with FAR to identify matched assets, assets found but not in FAR and assets not found.

07 REPORTING

Prepare location-wise and consolidated reports with asset details, photographs and exception lists.

08 SIGN-OFF & CLOSURE

Review reports with the client, resolve open items and obtain formal sign-off for closure.

PROJECT MANAGEMENT AND GOVERNANCE

Dedicated Project Team

Experienced and trained resources

Regular Monitoring

Progress tracking and issue resolution

Quality Assurance

Standardised checklists and review process

Client Collaboration

Regular updates and stakeholder engagement

KEY OUTCOMES FOR OUR CLIENTS

Accurate asset records

Clear identification of exceptions and gaps

Audit-ready documentation

Better asset control and decision making

A structured approach designed to deliver reliable asset information and long-term value.

DELIVERABLES & REPORTING

Accurate, structured and actionable outputs for better asset management

KEY DELIVERABLES

01

Verified Asset Data

Complete and validated list of assets with key details (location, sub location, make, model, serial number, condition, remarks).

02

Tagged Assets

Non-destructive barcode / QR code tags on all taggable assets.

03

Reconciliation with FAR

Matched assets, assets present but not recorded and assets not found.

04

Consolidated Reports

Location-wise and combined reports with analysis and observations.

05

Sign-off from Authorized Person

Branch / location sign-off for verified assets.

SAMPLE REPORTS

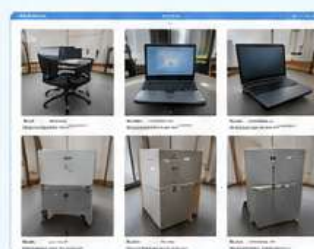

Asset Reconciliation Report

Branch / location-wise summary of matched, not-found and unrecorded assets.

Management Summary

Overall summary and key observations for decision making.

Asset Photo Gallery

Photographs of verified assets for easy reference and audit.

Exception Report

List of assets not found or not recorded in FAR with details and remarks.
